

LEADERSHIP REVIEW · ECOMMERCE

Ecommerce performance, **with the data exposed**

Recorded sales, category momentum, operating quality, and the next decision.

| *Cleaned transaction file · directional read*

Made with GAMMA

₹3.81M in recorded sales, but the dataset needs a **clean read**

Orders: 380 records in the cleaned transaction file

Recorded sales: ₹3.81M across 343 rows with sales values

Recorded profit: ₹703K, with missing commercial fields on part of the file

Leadership read: use the directional pattern confidently; validate the missing-value slice before committing to a final KPI

May and June carry the momentum

*May is the peak at ₹771K;
June follows at ₹706K.*

March is the low point at ₹269K. Sales accelerate into May, then soften in June while remaining above January and March.

Electronics is the largest commercial engine

Electronics leads at ₹1.41M, ahead of Fashion at ₹1.01M.

Furniture contributes ₹718K; Home contributes ₹668K. The mix is led by higher-value technology products, with room to balance the next growth bet.

Laptops and chairs are the two biggest product pools

The top four products are tightly clustered.

Laptop: ₹729K · **Chair:** ₹718K ·
Mouse: ₹682K · **Bottle:** ₹668K
Watch: ₹548K · Shoes: ₹463K

Returns and cancellations are too large to treat as **noise**

Returned and cancelled orders together slightly exceed delivered orders.

**Returned: 97 · Cancelled: 94 ·
Delivered: 100 · Pending: 89**

Conversion quality and post-purchase experience deserve the same attention as top-line demand.

Pune and Bengaluru are the strongest markets

Protect Pune and Bengaluru before scaling elsewhere.

Pune: ₹894K · **Bengaluru:** ₹828K
Delhi: ₹580K · Lucknow: ₹574K
Mumbai: ₹521K · Jaipur: ₹412K

The next decision is not “where is demand?” but “where is **profitable demand?**”

- 1 Reconcile missing Unit_Price and Sales fields** before publishing a final KPI pack
- 2 Diagnose return and cancellation drivers** by product, city, and payment mode
- 3 Protect Pune and Bengaluru** while testing the Electronics-to-Fashion growth handoff

NEXT REVIEW · THREE ACTIONS

Three actions for the next review

- 1 Data:** lock one trusted KPI definition and a completeness check
- 2 Operations:** bring a return, cancellation, and pending-order recovery plan
- 3 Growth:** turn the product and city mix into two focused experiments
